IMMOBILIER SITE WEB

8 octobre 2020

8

This web site project started during my traineeship at K-Expansion.
This document will show quick preview of frontend application.

I will show page by page how it works front-end application.

DELETE 🗑

ADMIN AREA PAGE

8 octobre 2020 // List and Delete locations

This page where the admins can liste, delete or create location objects. For now, this page is protected just for authentication, there is no difference between a user and admin. This part of project is to develop.

In this example we have only one object in db.We can observe the details of this location register and also we can delete it permanently from db.
